

Bungee Cords are handy and versatile cargo control products that can be used in many different ways. Secure light cargo that does not react easily to wind. Secure tarps to trees, poles, tent frames and truck beds. Secure lids on trash cans and other containers. Secure life jackets and boat bumpers. Secure small coolers and jackets to ATV racks. The list is endless. Just remember that Bungee Cords are not toys. An over-stretched cord can spring back with enough force to cause serious injury. Never stretch a bungee cord more than 50% of its original length. Keep body parts, especially eyes and teeth, out of the rebound path. Make sure hooks are not bent, are fully secured and never tip loaded. And, always remove the cords in a controlled manner.

STANDARD BUNGEEES

Part No.	Length	Ship Pack QTY	Master QTY	UPC
95413	13in /33cm	10	50	712850954135
